Montreal, Canada
Abstract #: 339

The Environmental Neuroactive Chemicals List of Prioritized Substances for Human Biomonitoring and Neurotoxicity Testing: A Database and High-Throughput Toxicokinetics Approach

Lauren E. Koval^{1,2}, Elise Hickman^{1,2,3,4}, Caroline Ring⁵, Taylor Teitelbaum¹, Todd Cohen^{6,7,8}, Giulia Fragola⁶, Mark J. Zylka^{7,8}, Lawrence S. Engel⁹, Kun Lu^{1,2,4}, Stephanie M. Engel⁹, Julia E. Rager^{1,2,3,4}

¹ Department of Environmental Sciences and Engineering, Gillings School of Global Public Health, The University of North Carolina at Chapel Hill

² Institute for Environmental Health Solutions, Gillings School of Global Public Health, The University of North Carolina at Chapel Hill

³ Center for Center for Environmental Medicine, Asthma and Lung Biology, School of Medicine, The University of North Carolina at Chapel Hill

⁴ Curriculum in Toxicology and Environmental Medicine, School of Medicine The University of North Carolina at Chapel Hill, Chapel Hill

⁵ Center for Computational Toxicology and Exposure, Office of Research and Development, United States Environmental Protection Agency

⁶ Department of Neurology, School of Medicine, The University of North Carolina at Chapel Hill

⁷ Department of Cell Biology and Physiology, School of Medicine, The University of North Carolina at Chapel Hill

⁸ UNC Neuroscience Center, School of Medicine, The University of North Carolina at Chapel Hill

⁹ Department of Epidemiology, Gillings School of Global Public Health, University of North Carolina
